Figure 1 is a line graph showing the number of species over time (0 to 200) for three different scenarios. The y-axis represents the 'Number of species' (0 to 20). The x-axis represents 'Time' (0 to 200). The red line (no immigration) starts at 19 and drops sharply to near 0. The blue line (immigration from 100 species) starts at 19 and fluctuates around 18. The black line (immigration from 100 species with extinction) starts at 10 and fluctuates around 10.
