Figure 1 is a line graph showing the number of species over time for two groups: 'No treatment' (red line) and 'Treatment' (blue line). The x-axis is 'Time' (0 to 200) and the y-axis is 'Number of species' (0 to 15). The 'No treatment' group shows a sharp initial drop from ~16 to ~8 species, followed by a noisy recovery to ~10 species. The 'Treatment' group shows a sharp initial drop from ~16 to ~12 species, followed by a noisy recovery to ~12 species. A horizontal black line is drawn at approximately 8.5 species.
